Quick facts about organ, eye and tissue donation

- ① The number of people in the U.S. awaiting an organ transplant is approaching 100,000; 18 people die waiting every day.
- ② Nearly three-fourths of those waiting need a kidney; living donors comprise almost half of the kidneys transplanted.
- ③ People of all ages and most medical histories are potential donors.
- ④ 92% of the U.S. population support organ, eye and tissue donation; just 20% take the steps required to ensure their wishes are known and honored.
