

# Recycle Yourself

Save lives through organ, eye,  
and tissue donation!

**GO**RECYCLE**YOURSELF.COM**

Registers donors & educates the public about donation. We work with...

Organ, eye, and tissue recovery professionals

Transplant Centers

LEGACY  
HEALTH

OHSU

DMV

# Do you have a “D” or a ♥ on your license?

*After I die, I wish to donate  
**organs, eyes, and/or tissues**  
to **save** someone's life,  
restore someone's vision,  
and/or restore someone's  
mobility.*

# Why **Don't** People Register?

## Fears, Myths, and Misinformation

- Movies and TV
- Concern over medical care
- Religious beliefs about donation
- Don't think they are eligible
- Don't want to think about death
- Don't know how to sign up

# The Need for Organ Donors

Every **10 minutes**, someone is added to the waiting list.

On average, **17 people** die each day while waiting for a transplant.

# 80% of everyone waiting needs a kidney

People in the US are increasingly at risk for preventable conditions which eventually lead to kidney failure:

- Type II Diabetes\*
- High Blood Pressure\*

Hispanic, African, Asian, and Native Americans are up to 3x more likely to suffer from these conditions.

*\* Can be prevented or delayed by staying at a healthy weight, eating well, and getting exercise.*

# What is it like waiting?

1. Doctors refer sick patient to a transplant center.
2. A committee of doctors, surgeons, and hospital staff decide whether a patient is a candidate for transplant.
3. A transplant candidate is added to the national waiting list.
4. People stay on the national waiting list for days, months, or even years.

## The Waiting List

## Alysia's Story

# Local Heroes

Over 3 million Oregonians are registered donors

≈ 44,000 Oregonians died in 2022

1,622 cornea donors = 2,150 corneal transplants

1,013 tissue donors = 126,625 tissue transplants

205 organ donors = 411 organ transplants

**UNOS**<sup>SM</sup>  
UNITED NETWORK FOR ORGAN SHARING

A background illustration featuring a detailed anatomical drawing of a human kidney in the center. The kidney is shown in cross-section, revealing its internal structure with a reddish-brown outer cortex and a lighter, more fibrous inner medulla. It is surrounded by various flowers and foliage, including a large pink flower on the left, a yellow flower on the right, and several green leaves at the bottom. The entire scene is set against a light pink background with a darker pink border.

# True or False:

Organ donation is very common.

**False.** Not everyone who dies can donate organs, because they must die under very specific circumstances.

# Criteria for Organ Donation

- Donor died in a hospital.
- Donor was placed on mechanical ventilator prior to death.
  - Blood and oxygen continue to flow through the vital organs.
- Donor died due to severe brain damage.
  - Electricity, blood and oxygen irreversibly cease to flow.

# Next Steps

If someone **CAN** be an organ donor...

- A separate team comes in
- The registry is checked
- The family is approached
  - If under 18, the family will be asked to authorize donation
- **TALK TO YOUR FAMILY TODAY!**

# Organ Recovery

The recovery surgery takes place in an operating room, in the same sterile and careful way as in any surgery.

- There are no costs to the family for the donation process.
- Being an organ or tissue donor does not interfere with funeral arrangements.

# Which Organs Can be Donated?

# One organ donor

**can save up to 8 lives**

# What is a Cornea?

[John's Story](#)

## True or False:

Donated corneas can restore sight to the blind.

**True.** When the cornea is damaged due to injury, disease, infection or a hereditary condition, corneal transplant surgery may be an option.

# Which tissues can be donated?

[Jan's Story](#)

# One tissue and eye donor

## can save or enhance over 125 lives

# True or False:

Grandparents  
can be donors.

**True.** No one should rule themselves out due to age, health, or medical conditions! Additionally, the criteria required for *organ* donation do not apply to tissue and eye donation.

# Life After Transplant

- Managing rejection
- Healthy lifestyle
- More LIFE

**Sarah Hyland**

**Selena Gomez**

**Laurie  
Hernandez**

**Mandy  
Patinkin**

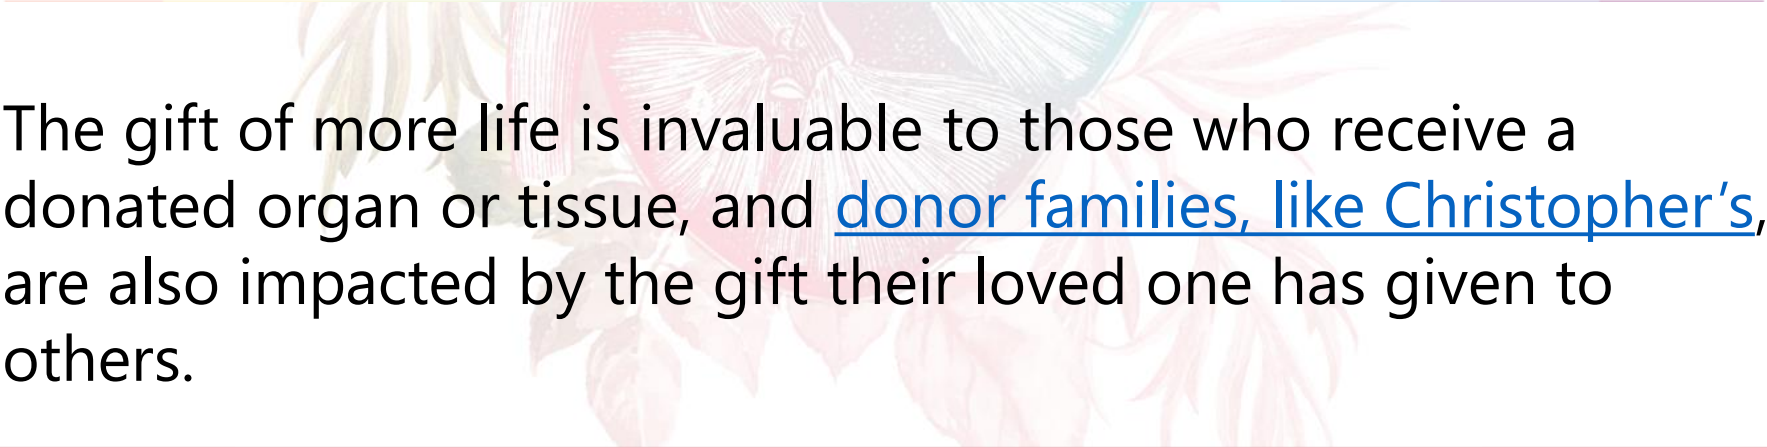

**George Lopez**

**Steve Jobs**

ney through the transplant system can  
many stops, people and organizations

The gift of more life is invaluable to those who receive a donated organ or tissue, and [donor families, like Christopher's](#), are also impacted by the gift their loved one has given to others.

# What can you donate while living?

- A kidney

You can donate a kidney to save the life of anyone who matches your blood and tissue type – recipients don't have to be a blood relative!

- Paired and chain donation
- How safe is it for the donor?

- A portion of your liver

- Very small portion of lung called a lobe

- Blood and bone marrow

Living donation has nothing to do with *registering as a deceased donor*.

**In the US, you must be at least 18 to consider living kidney donation.**

# Pop Quiz

- 1) How many people's lives can be saved or enhanced by tissue and/or cornea donation?
- 2) Do you know if your family members are registered donors?
- 3) What is one new thing you learned today?

# What Can You Do Today?

- Eat right and exercise!
  - Especially if your background puts you at high risk for Type II Diabetes or High Blood Pressure!
- Register!
  - Online
  - Paper form
  - Say "YES" to donation at DMV
  - On iPhone Medical ID (at age 18)
- Talk to your family!
- Host a donor drive!
- Start a SODA Chapter

Visit [www.sodanational.org](http://www.sodanational.org).

☒ **YES** I'D LIKE ORGANS TO BE  
THERE IF I NEED THEM.

IF NOBODY GIVES, **NOBODY GETS.**
