

LET'S SAVE HER LIFE!

NEEDED:

A living kidney donor for Diane Doan.

For over 6 years I have been a dialysis nurse. I love my patients and all the machinery, it touches the 'engineer genes' I got from my father. It's ironic that a dialysis nurse should have kidney failure. I am doing dialysis at home and have a boat load of rescued animals to attend to! If you or someone in your circle has been thinking about donating a kidney and could find it in your heart, it would provide a longer quality of life for me. The person that donates to me (or another) doesn't even have to be a match with Paired Kidney Donation. Persons interested need only be healthy!
