

Needed: A living kidney donor for Leslie Olsen.

LET'S SAVE HER LIFE!

"I am 49 years old, was born with a developmental disability and suffer from Stage 4 kidney failure. I am somewhat independent and have two part-time jobs. I enjoy movies, reading, cruising, Special Olympics and NFL football. I will have to go on dialysis if a living kidney donor cannot be found. This will impact my life in a major way. Thank you!"

Most people have two kidneys but can live normally with one. Would you or someone you know be willing to "share your spare"?

Please share this link and be a Superhero in my search for a living kidney donor:
